SRO TOOLBOX [sm]

Real-Time Community Intelligence

Student Risk Management Suite

Real-Time Social Media Monitoring

Knowing what is being said online about your school can help you stay on top of developing threats and potential security risks. Our state-of-the-art social monitoring AI not only logs and records potential threats but also has the ability to see potential compromising situations developing giving your safety team the ability to intervene early.

At-Risk Student Assessment

By integrating with popular student information systems, our advanced AI helps your administrators and counselors detect at-risk students based on attendance, grades, discipline events and other factors. By cross referencing external data sources such known relationship, criminal and domestic court records, our AI can extend risk detection beyond the walls of your school making it even more effective at mitigating risk.

Internal Resource Monitoring

Monitoring external information sources like social media is important but keeping current on internal resources can be equally effective at mitigating threats.

Using your 4S Mobile APP, administrators, resource officers and counselors can easily monitor login, e-mail and common communication tools such as G-Suite and other supported online learning resources instantly alerting you when potential safety or other threats are detected.

4S Open-AI Integrates With...

- Sylogist Wengage SIS
- G-Suite for Education
- Most Network Management Tools
- HALO Vape Sensors
- Verkada Vape Sensors
- Many Common Keyless Entry Systems
- Most IP Camera Platforms

4 KIOSK sm
Visitor Management

Check In/Out Kiosks

Tracking visitors to your campus can be an important step in maintaining premise security. With **4-Kiosk**sm, your buildings can effortlessly track visitors while automatically screening them against national sex offender databases, local law enforcement watch lists as well as national criminal databases automatically notifying security personnel when a visitor violates organizational policies.

Visitors can easily pre-schedule appointments and have staff automatically notified by SMS or e-mail when the visitor arrives.

Teachers can be automatically notified when a parent arrives on campus to checkout a child, allowing your office staff to streamline the processing challenges of having a visitor on your campus.

Features

- No proprietary basic hardware to purchase; Works on any Windows PC, IOS or Android device
- Integrates with many student information systems including Sylogist Wengage SIS[1]
- Supports scheduling and appointments
- Automatically screens visitors against local and national registered sex offender databases
- Capture photos and print temporary ID badges[2]
- Integrates with 4S Watch Lists
- Optional subscriptions to public notification lists
- And more…

1 Requires API integration feature; 2 Requires purchase of compatible printer

4 PAWS [sm]

K-9 Drug Detection Services

Drug Detection Services

Youth drug abuse is a high-profile public health concern, with at least 1-in-8 teenagers abusing an illicit substance in the last year[1]. Drug abuse in public schools has surged over 61% since 2016. With new sources and methods for distributions of these dangerous substances, your school must take aggressive steps to protect your students and minimize legal liabilities.

Unlike other drug dog services, the **4-PAWS** program is specifically targeted to locating and mitigating public school drug threats by integrating threat analysis and real-time community social media trends, conversations and other threatening behaviors.

[1] *National Center For Drug Abuse Statistics*

K-9 Service Key Features

- Flexible "*pay-as-you-use-it*" or packaged K-9 service plans
- Fully randomized searches prevents students and staff from knowing when searches will be executed
- Integrated SIS offense tracking[2]
- One-Click SIS integrated[2] student contact logging, discipline and reporting
- Double search and profiling prevention avoids searching a given student multiple times
- Same-day custom searches when needed[3]

[2] *Works with most popular student information systems including Wengage SIS;* [3] *Additional fees apply*

4 SHOOTER sm

Active Shooter Preparedness

An active shooter situation can happen anywhere, anytime. Here are a few simple things every school or business should implement to help keep your patrons safe:

- Lock all internal and external entry points
- Require a single point of entry to each building
- Know your surroundings and who is entering
- Question persons whom you do not recognize
- Educate your staff and common patrons on what to do
- Identify a place to hide, stay low and keep out of sight
- Practice drills with staff and common patrons often
- Limit public access to front offices and showrooms only
- Post "NO WEAPONS" placards on all entries
- Remember, concealed weapons can become a potential security compromise, know and comply with your organizational policies on carrying concealed weapons

REMEMBER: Nothing can protect you, your patrons or organization 100%, but being observant and vigilant about physical security can go a long way toward keeping you and your patrons safe!
